Handwritten text on a lined background, possibly a list or notes. The first line contains a colon followed by several characters: $\rho, \rho, \rho, \rho, \rho, \rho$. The second line contains a series of characters: $\sigma, \sigma, \sigma, \sigma, \sigma, \sigma$.

Handwritten text on a lined background, possibly a list or notes. The text is written in a cursive style and includes various mathematical symbols and characters, such as $\rho, \sigma, \tau, \omega, \nu, \mu, \lambda, \kappa, \eta, \zeta, \xi, \delta, \gamma, \beta, \alpha$, and some numbers like 1, 2, 3, 4, 5, 6, 7, 8, 9, 10. The text is arranged in several lines, with some characters appearing to be part of a sequence or list.

Handwritten musical notation on a five-line staff, consisting of approximately 12 lines of notes and rests. The notation is dense and appears to be a complex piece of music, possibly a fugue or a highly technical exercise. The notes are written in a cursive style, and there are many accidentals and dynamic markings throughout. The piece concludes with a double bar line and a fermata.

Handwritten cursive script on lined paper, consisting of approximately 12 lines of text. The writing is fluid and characteristic of a personal or informal style. The characters are highly connected and vary in slant and height, typical of cursive handwriting. The lines are written on a set of horizontal blue or grey lines.

Handwritten text on lined paper, consisting of several lines of cursive script. The text is mostly illegible due to the cursive style and some fading. The lines are approximately as follows:

Handwritten musical notation on a five-line staff. The notation consists of various rhythmic values, stems, and beams, typical of a musical score. The notes are written in a cursive, handwritten style. The staff contains approximately 12 measures of music, with some notes beamed together and others standing alone. The notation is dense and fills most of the staff lines.

Handwritten cursive script on lined paper, consisting of approximately 12 lines of text. The characters are highly stylized and difficult to decipher, but appear to be a form of shorthand or a specific dialect of a cursive script. The text is written in black ink on white paper with horizontal blue lines.

Handwritten text on a set of three horizontal lines. The text is written in a cursive script and appears to be a list or a series of notes. The characters are somewhat stylized and difficult to decipher precisely, but they seem to include numbers and letters.

Handwritten text on a set of three horizontal lines, continuing from the previous block. The script is consistent, showing a mix of numbers and letters in a cursive hand.

Handwritten text on a four-line staff, consisting of several lines of cursive script. The characters are highly stylized and difficult to decipher, but appear to be a form of shorthand or a specific dialect of a cursive script.

Handwritten text on a four-line staff, continuing the cursive script from the previous block. The lines are filled with dense, flowing characters.

Handwritten musical notation on a five-line staff. The notation consists of various rhythmic patterns, including eighth and sixteenth notes, rests, and beams connecting notes. There are some symbols that look like 'S' or 'K' written above the staff, possibly indicating specific musical instructions or a key signature.

Handwritten musical notation on a five-line staff, continuing from the previous section. It features similar rhythmic patterns and note groupings, with some notes beamed together and others written as single notes or rests.

The first part of the
 work is to find the
 number of solutions of the
 equation $x^2 + y^2 = z^2$ in
 integers. It is known that
 there are infinitely many
 solutions. For example,
 $(3, 4, 5)$ is a solution.
 The next part is to find
 the number of solutions of
 the equation $x^2 + y^2 + z^2 = w^2$
 in integers. It is known
 that there are infinitely
 many solutions. For
 example, $(1, 1, 1, 2)$ is a
 solution. The last part
 of the work is to find
 the number of solutions of
 the equation $x^2 + y^2 + z^2 + w^2 = v^2$
 in integers. It is known
 that there are infinitely
 many solutions. For
 example, $(1, 1, 1, 1, 2)$ is
 a solution.
