Handwritten text in a cursive script, likely representing mathematical or scientific concepts. The text is written in a fluid, connected style with various symbols and characters. It appears to be a series of notes or a derivation, possibly involving variables and mathematical operations. The text is written in a dark ink on a light background. The characters are somewhat stylized and difficult to decipher precisely, but they seem to follow a logical sequence of symbols and words. Handwritten text in a cursive script, likely a personal letter or diary entry. The text is written in black ink on a light-colored background. The handwriting is fluid and somewhat slanted. The text is arranged in approximately 12 lines, with some lines starting with a capital letter. The content is difficult to decipher due to the cursive style and some fading or blurring of the ink. The text appears to be a mix of words and phrases, possibly including names and dates. The overall appearance is that of a handwritten document from the late 19th or early 20th century.

Let f be a continuous function on $[a, b]$. Then
the definite integral $\int_a^b f(x) dx$ is the limit
of the Riemann sum $\sum_{k=1}^n f(x_k^*) \Delta x_k$ as
the number of subintervals n increases
without bound, provided that the maximum
width of the subintervals Δx_k approaches
zero. In symbols, $\lim_{n \rightarrow \infty} \sum_{k=1}^n f(x_k^*) \Delta x_k = \int_a^b f(x) dx$.

Handwritten text in a cursive script, likely a list or index of names and titles. The text is written in a dark ink on a light background. The characters are highly stylized and difficult to decipher, but some words are recognizable, such as "Alcibiades" and "Alcibiades". The text is arranged in approximately 12 lines, with some lines starting with a small mark resembling a checkmark or a similar symbol. The overall appearance is that of a handwritten manuscript or a list of names.
